Offline verification now available: UIDAI

NEW DELHI: Service providers can now verify unique identification numbers for Aadhaar and other biometric data in an offline mode. The new feature allows them to verify Aadhaar numbers through QR codes or by downloading the Aadhaar app. The UIDAI has received an increased number of applications, and it is expected to add more in the coming months.

The UIDAI has been working on this project for several months, and it is now available in select locations. The new feature will help those who do not have access to the internet or other digital services. The UIDAI has also introduced a new QR code system that allows for faster and more secure identification.

The UIDAI has been in the news recently due to the controversy surrounding the collection of user data. The UIDAI has been criticized for its handling of user data, and there have been concerns about the company's privacy policies.

The UIDAI has recently announced that it will be introducing a new feature that will allow users to securely store their biometric data. The new feature will allow users to store their biometric data on their devices, and it will also allow them to access their data from any device.

The UIDAI has been working to improve its services and to increase its user base. The company has introduced several new features in recent months, and it is expected to continue to do so in the future.
