## 2. INTRODUCTION

### 2.1 About the UID Project

The Government of India (GoI) has embarked upon an ambitious initiative to provide a Unique Identification (UID) more popularly known as the “Aadhaar” number, to every resident of India and has constituted the Unique Identification Authority of India (UIDAI) for this purpose. The timing of this initiative coincides with the increased focus of the GoI on social inclusion and development through massive investments in various social sector programs, and transformation in public services delivery through e-Governance programs. The UID has been envisioned as a means for residents to easily and effectively establish their identity, to any agency, anywhere in the country, without having to repeatedly produce identity documentation. More details on the UIDAI and Aadhaar can be found on the website: <http://www.uidai.gov.in>.

In this context, the Haryana State UID Registrar invites bids from enrolment agencies presently empanelled by UIDAI for carrying out the various functions and activities related to UID enrolment such as setting up of enrolment centers, undertaking collection of demographic and biometric data for UID enrolment and other data required by the Registrar as per scope of work defined in this RFQ.

### 2.2 About Enrolment of Residents in Haryana

The State of Haryana has a population of 2.53 crores as per 2011 census. The Government of Haryana is committed towards the success of the UID project. Approximately 20 Lakh residents have been enrolled in Haryana under UID in Phase I of the project.

For the UID project in Haryana, the Additional Chief Secretary, Revenue & Disaster Management Department has been designated as the State UID Registrar.

In addition to the collection of KYR data and biometrics of residents (as mandated by the UIDAI), Haryana Government has decided to collect additional State-specific data (KYR+ data) of residents during UID enrolments. The details of KYR+ data fields and data collection process are available in Section 4.1.1 and Annexure V of the RFQ.

The Enrolment Process (Phase II) will be carried out in pre-selected seventeen (17) districts of the state grouped into seven (7) clusters based on geographical proximity – for the express purpose of this enrolment. The clusters and their constituents are detailed in Annexure VI.

#### 4. Process Details

##### 4.1. Resident Enrolment Process Flow

##### 4.2. Resident Enrolment Process Description

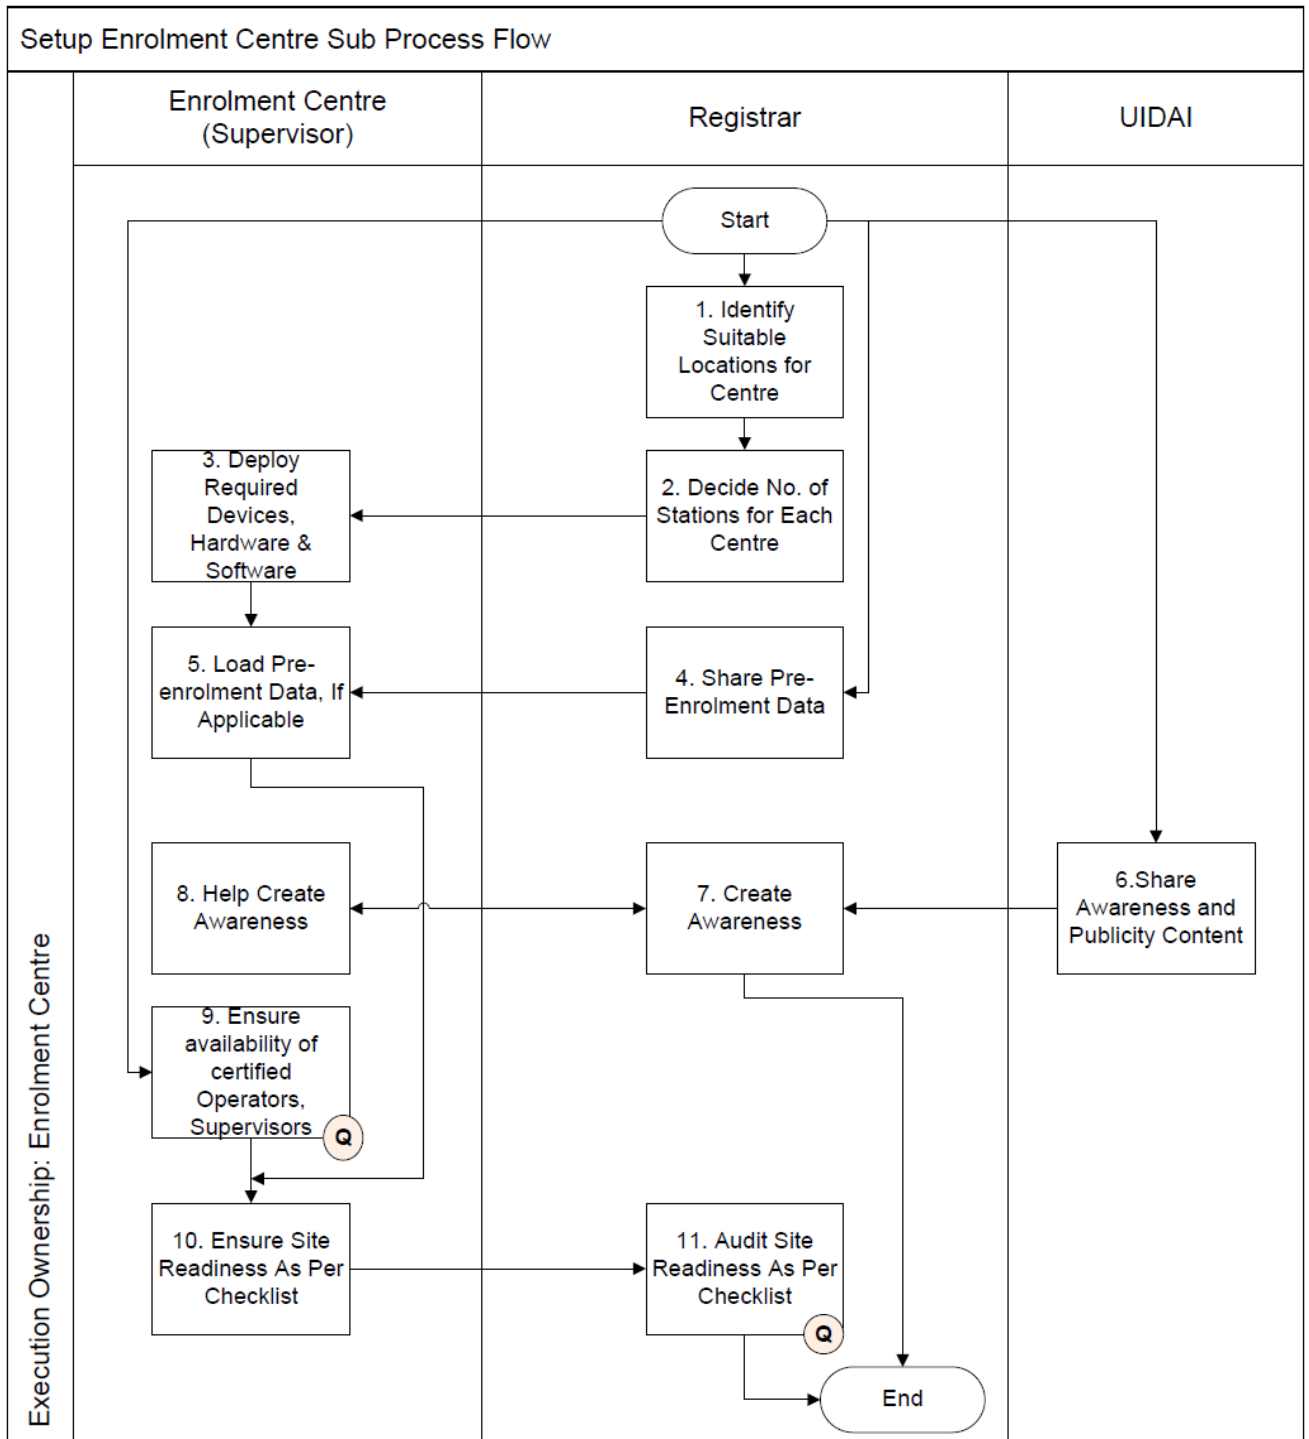

S.No.	Step	Responsibility	Reference
	Start This process begins when an Enrolment Agency is ready to start enrolling residents. To begin enrolments, Enrolment Agency needs to Setup Enrolment Centre. Go to Step 1.		
1.	Setup Enrolment Centre Initiate sub process 4.3 Setup Enrolment Centre. This contains details on setting up an enrolment centre.	Enrolment Agency	<a href="#">4.3 Setup Enrolment Centre</a>
2.	Capture Demographic and Biometric Data and Ready for Transfer	Enrolment Agency	<a href="#">4.5 Capture Demographic and</a>

	<p>After an enrolment centre is ready, Enrolment Agencies can begin the process of capturing residents' demographic and biometric data. For details on how to capture data, go to sub process</p> <p>4.5 Capture Demographic and Biometric Data. After Data Capture, Data files are to be ready at identified/specified location for transfer to CIDR. Refer external process for 1<sup>st</sup> Mile logistics which prescribes the methods by which the data has to be transferred to the Authority. The enrolling agencies are therefore advised to obtain these instructions before they proceed to collect the demographic and biometric data of the willing enrolees.</p> <p>The Unique Identification Authority of India (UIDAI) accords highest importance and primacy to the security of data collected on the enrolees who enrol themselves to obtain Unique Identification Numbers. It is the responsibility of the enrolling agencies to make sure that the data is kept in a very secure and confidential manner and under no circumstances shall they use the data themselves nor part with the data to any other agency than the UIDAI. Privacy of an individual's data is accorded utmost importance by the UIDAI. If there is any violation of privacy by the enrolling agency or through its employees, contractual or otherwise, there shall be a breach of contract, apart from attracting the penal provisions of the Act which will govern the operations of the Authority.</p>		<p><a href="#">Biometric Data and Ready for Transfer Sub Process</a></p> <p>External process for 1<sup>st</sup> Mile Logistics Process</p>
3.	<p>Process , Sample Data Audit and feedback</p> <p>UIDAI may do sample data audits for quality. This will reduce the chances of enrolment failures/rejections later due to poor data quality. Registrar should audit adherence to process by enrolment agency to prevent malpractices. These audits may be conducted by the Registrar, a 3rd party appointed by the Registrar or by any other party/mechanism deemed fit by the Registrar.</p> <p>UIDAI may also undertake sample process</p>	UIDAI and Registrar	

	audit during enrolment and also provide feedback on the audit conducted by the Registrar. Based on feedback, Enrolment Agency may need to make some adjustments/changes in its process.

#### 4.3. Setup Enrolment Centre Sub Process Flow

#### 4.4. Setup Enrolment Centre Sub Process Description

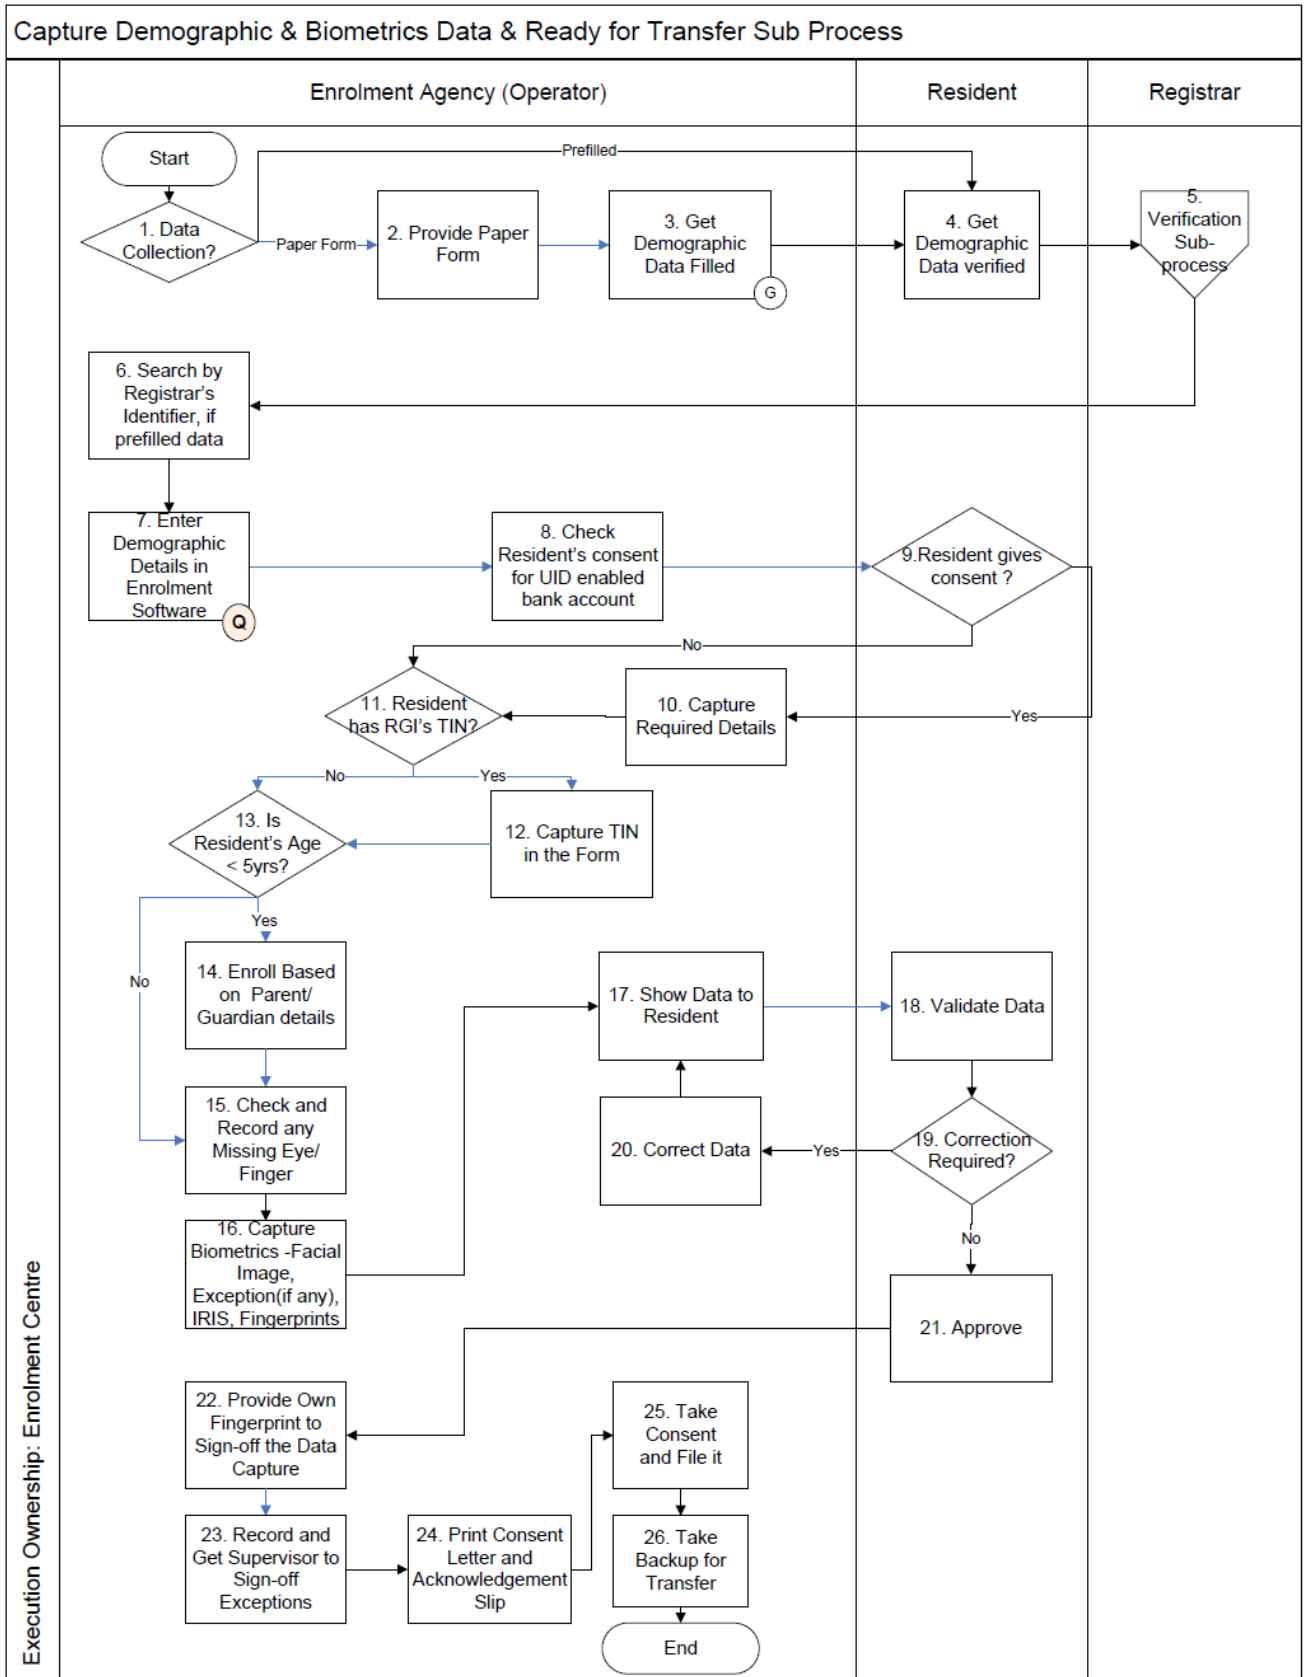

S.No.	Step	Responsibility	Reference
	Start To Setup enrolment centres, activities that		

	<p>need to be initiated are:</p> <p>(a) Step 1 Identify suitable locations for Enrolment</p> <p>(b) Step 4 Share Pre-Enrolment Data, if used</p> <p>(c) Step 6 Ensure Availability of Certified Operators, Supervisors</p> <p>(d) Step 7 Share Awareness and Publicity Content</p>		
1.	<p>Identify Suitable Locations for Centre</p> <p>Registrar identifies suitable locations where enrolment centres may be Setup as follows:</p> <p>(a) Assess details of the area including the terrain, local weather conditions, law and order situation, logistics support etc.</p> <p>(b) The enrolment Centre selected must be secured and protected from the natural elements so that there is no damage or loss to the devices and data.</p> <p>(c) Co-ordinate with the local district administration right from the planning stage to the actual roll-out of the enrolment.</p> <p>(d) In order to cover the difficult-to-reach areas and villages where proper premises are not available, it may be necessary to have mobile enrolment centres. The list of difficult areas will be available with the State Government.</p> <p>(e) In case of mobile enrolment centres/stations, the decision on frequency/period of availability shall be decided by the Registrar based on density of population, geographical terrain etc.</p>	Registrar	
2.	<p>Decide Number of Stations for Each Centre</p> <p>The number of stations can be decided based on the target number of days for completion of enrolment in the particular area or the district and the expected number of enrolees in the area. It should be borne in mind that only 60-70 enrolments can be done by one station in a day.</p> <p>Typically, the Enrolment Centres set up in an area / district should be able to complete the coverage in 20 – 25 days. This would help focus the efforts of the district/ area</p>	Registrar	

	administration in the area and also ramp up the publicity in all the modes so as to bring the residents to the Enrolling Centres for the enrolment.		
3.	Deploy Hardware, Software for Enrolment Ensure all hardware and software as mentioned in the 5.2.1 are deployed at the enrolment centre. Test the hardware / software for proper working.	Enrolment Agency	<a href="#">5.2.1 Checklist for Setting up Enrolment Centre</a>
4.	Share Pre-enrolment Data Available, if Used Where applicable, share the pre-enrolment data / beneficiary database with Enrolment Agencies for carrying out the enrolments. The details of the database need to be discussed and sent to UIDAI in advance in prescribed format and aligned to UIDAI requirements as per technology integration toolkit.	Registrar	<a href="#">5.1.1 KYR Standards for Collecting Demographic Data</a>
5.	Load Pre-enrolment Residents Data on the Enrolment Station Laptop Load and test beneficiary database on enrolment centre laptops / desktops and ensure it is accessible/ searchable.	Enrolment Agency	
6.	Share Awareness and Publicity Content Share awareness and publicity content, as detailed in the external process, with the Registrar. Guide them in adapting the content / communication.	UIDAI	
7.	Create Awareness in Target Beneficiaries / Residents Ensure right communication reaches the target resident groups with respect to timing and location for enrolment centres, benefits of enrolling etc.	Registrar	
8.	Help Create Awareness Enrolment Agency needs to assist the Registrar in communication and generating resident awareness. The role of the enrolment agency should be limited to publicising the content provided by the UIDAI/ Registrars. The EA should not add to / modify /delete the content provided by Registrar/ UIDAI.	Enrolment Agency	
9.	Ensure Availability of Certified Operators, Supervisors Although training is not mandatory,	Enrolment Agency	

	<p>certification is mandatory for Operators. Ensure certified Operators and Supervisors are available at enrolment centres. The no. of certified Operators should be more than the no. of stations for job rotation and avoiding Operator fatigue.</p> <p>The supervisor is required to handle any situation that requires immediate attention and handle exceptions at the enrolment centre itself and inform the Registrar subsequently.</p> <p>Technical personnel for attending power /system / biometric instrument related maintenance problems should be available on call in a centrally located place covering about six enrolment centres so that the downtime can be minimized.</p> <p>Proceed to Step 10. Ensure Site Readiness and Fill Checklist.</p>		
10.	<p>Ensure Site Readiness and Fill Checklist</p> <p>Ensure the enrolment centre is Setup as per <a href="#">5.2.1 Checklist for Setting up Enrolment Centre.</a></p> <p>Document exceptions, if any, and sign-off the checklist.</p>	Enrolment Agency	<a href="#">5.2.1 Checklist for Setting up Enrolment Centre</a>
11.	<p>Audit Site Readiness</p> <p>Audit enrolment centre for readiness using <a href="#">5.2.1 Checklist for Setting up Enrolment Centre.</a> The Registrar's supervisor will also sign-off the checklist.</p>	Registrar (Supervisor)

**4.5. Capture Demographic and Biometric Data and Ready for Transfer Sub Process Flow**

**4.6. Capture Demographic and Biometric Data and Ready for Transfer Sub Process**  
**Description**

S.No	Step	Responsibility	Reference
	Start This is the sub-process where actual resident enrolment begins. This process begins when a resident approaches an Enrolment Centre for enrolment.		
1.	Pre-Filled Data? Initial collection of demographic data can happen via multiple channels. The data can be either extracted from a pre-filled database OR the data can be filled in a paper-based form when a resident approaches an enrolment centre. If pre-filled data is not available, proceed to Step 2. Provide Paper Form Else go to step no. 4.	Enrolment Agency (Operator)	
2.	Provide Paper Form Enrolment forms (containing KYR fields) must be filled up at the enrolment centre along with Resident's signature. A Registrar can choose to have the Enrolment form as a part of their enrolment form OR to have separate forms for capturing KYR and KYR+ fields. These paper-based forms are to be maintained at enrolment centres.	Enrolment Agency (Operator)	<a href="#">5.2.2 Enrolment Form</a>
3.	Get Demographic Data Filled Up Guide resident in filling up and signing the form. If the Resident is unable to fill the form himself / herself, operator may take assistance from local support such as (but not limited to) Village Accountant, Field Inspector, Introducer, NGOs / CSOs etc. Refer standard 5.1.1 for details on capturing the KYR field. Refer guideline 5.1.2 for details on capturing resident demographic information.	Enrolment Agency (Operator)	<a href="#">5.1.1. KYR Standards for Collecting Demographic Data</a> <a href="#">5.1.2. Detailed Guidelines for Recording Demographic Data</a>
4.	Get demographic data verified. Resident needs to get the demographic data provided by him/her verified. Resident need to carry Original documents and a photocopy of Pol,PoA,DoB for verification.	Resident	
5.	Refer Verification Sub Process Flow for details 2 Distinct methods of verification are discussed in this document <ul style="list-style-type: none"> <li>• Based on supporting documents</li> <li>• Based on introducer system</li> </ul>	Registrar (Supervisor)	

6.	<p>Retrieve by Registrar's Identifier, if prefilled data If the resident is already a part of the Registrar's beneficiary database, retrieve resident's demographic details using the Registrar's Identifier. Some examples are (but not limited to)</p> <ol style="list-style-type: none"> <li>Ration card no (Food and Civil Supplies Department as Registrar)</li> <li>Job card no (Rural Development Department as Registrar)</li> <li>Policy no (LIC as Registrar)</li> <li>TIN (RGI as Registrar)</li> <li>EPIC no (Election Commission as Registrar)</li> <li>PAN no (Income Tax Department as Registrar)</li> </ol>	Enrolment Agency (Operator)	
7.	<p>Enter the verified demographic details in the enrolment software. The software has built-in features to ensure completion of mandatory data fields. In case data has been retrieved using Registrar's identifier, then check and correct/complete the demographic data.</p>	Enrolment Agency (Operator)	
8.	<p>Check Resident's Consent to participate in FI? Check with resident if he/she wants to participate in the scheme of financial inclusion (FI) by linking his current Bank A/C to his UID or by opening a new Bank A/C on the basis of his UID.</p>	Enrolment Agency (Operator)	
9.	<p>Resident gives consent If the resident has consented with a 'Yes' to participate in financial inclusion and linking/opening a bank A/C with his UID, proceed to step 10 to Capture Required Details. If resident does not give his/her consent, proceed to step 11 Resident has RGI's TIN?</p>	Resident	
10.	<p>Capture Required Details If the resident has an existing bank A/C, the following details must be procured: Name, Bank, Bank Branch, A/C Number and IFSC Code(to be filled in by the enrolment operator from the dropdown he'll have access to, in case the resident is unaware of the same). Irrespective of the registrar being a bank or non- bank, the above details have to be mandatorily filled in the enrolment form. Any additional information that a bank registrar would want to process may well be done after the above requirements are fulfilled. If a resident has consented to participate in FI, and</p>	Enrolment Agency (Operator)	

	<p>doesn't have an existing bank A/C, then the enrolment station must procure from the resident his preferred bank in which he wants to open a UID enabled bank account from the list of banks available with the enrolment station, and fill in the BIN (Bank Identification Number) for the same.</p> <p>If the Registrar involved in enrolment is a bank, determine if the resident has an existing A/C in this Registrar's bank. In such a case, an existing A/C in any other bank will mean the same as having „No' bank account.</p> <p>If the registrar is a bank, then their own BIN must be entered. This is subject to the approval of the resident's consent to open a new account with the registrar bank. If the resident denies doing so, proceed to check in step 11.</p>		
11.	<p>Resident has RGI's TIN?</p> <p>The Operator should check with the resident if the RGI (census) officials have visited his / her household for the census survey.</p> <p>If yes, proceed to Step 12. Capture TIN in the Form</p> <p>If no, proceed to next check in Step 13. Is Resident's Age &lt; 5yrs?</p>	Enrolment Agency (Operator)	
12.	<p>Capture TIN in the Form</p> <p>The RGI official would have provided a TIN / schedule no. to the household / individual. Capture the same in the enrolment software. Operator can inform the resident that this will be used for sharing resident's AADHAAR number with RGI. The resident may already have an AADHAAR prior to RGI process.</p>	Enrolment Agency (Operator)	
13.	<p>Is Resident's Age &lt; 5yrs?</p> <p>Check if the resident's age is less than 5 years.</p> <p>If yes, proceed to Step 14. Enrol based on Parent/Guardian Details</p> <p>If no, proceed to Step 15. Check and Record for any Eye/ Finger Missing</p>	Enrolment Agency (Operator)	
14.	<p>Enrol based on Parent/Guardian Details</p> <p>In case of children below the age of 5 years one of the parents' or guardian's name shall be recorded and UID or Enrolment Number (either of the two numbers) shall be recorded. This is mandatory.</p> <p>If the child is being enrolled along with his father /mother / guardian, first enrol the parent / guardian and record the parent's enrolment no. in the child's form.</p> <p>If the father /mother / guardian of the child has either not enrolled or does not possess AADHAAR number at</p>	Enrolment Agency (Operator)	

	the time of enrolment, the enrolment of that child cannot be done unless the above requirements are fulfilled.		
15.	<p>Check and Record for any Eye/ Finger Missing Check resident's eyes and fingers for fitness (missing/amputated). If the resident has any deformities, these also have to be captured on the Demographic screen.</p> <p>Enter Details of 'Missing Eye Indication' or 'Missing Finger Indication' as appropriate.</p> <p>In such a case, the operator shall assist the resident in the fingerprint capture to avoid capture of the extra finger/s.</p>	Enrolment Agency (Operator)	
16.	<p>Capture Biometrics - Facial Image, IRIS and Fingerprints</p> <p>Guide the resident to occupy the chair in front of the enrolment station. The resident should be instructed to be seated properly with their back upright and their face towards the camera.</p> <p>The images of all the ten fingers are to be captured. The fingerprints must be captured in the sequence of slaps of four fingers of left hand, right hand followed by the two thumbs.</p> <p>The Operator can visually verify facial image quality. Apart from this in-built quality checks in the software indicate the quality of biometrics at each stage. If any biometric exceptions have been specified on the demographic screen, these should be captured as photographs on the Photograph screen.</p> <p>The software forces re-captures for a fixed number of times when quality is not OK. Afterwards the Operator may try capture again but will not be forced by the system. However, it should be borne in mind that the forced capture should not become harassment for the resident.</p> <p>If required, ask resident to clean hands on towel and/or help to apply little more pressure on hand while taking image again. Similarly, guide resident to get appropriate quality of iris and facial images.</p> <p>Policies for biometric capture:  Iris - above 5 yrs mandatory (also used for de-duplication)  Fingerprint - above 5 yrs capture Fingerprint - above 15,</p>	Enrolment Agency (Operator)	<a href="#">5.1.4 Biometric Data Capture Standards</a>  <a href="#">5.1.5 Detailed Guidelines for Collecting Biometric Data</a>

	<p>treated like adult Face - all mandatory including infants Below 5 yrs - guardian/parent mandatory, after that optional</p> <p>Any biometric exception (any finger missing, any eye missing) - extra photo as well as supervisor signature</p> <p><i>AADHAAR Enrolment Client software automatically takes care of enforcing these policies. UIDAI may, from time to time, make modifications to these policies</i></p>		
17.	<p>Show Data to Resident</p> <p>The Operator shows the data entered to the resident on a monitor facing the resident and if required, reads out the content to the enrolee, to ensure that all details captured are correct.</p>	Enrolment Agency (Operator)	
18.	<p>Validate data</p> <p>The resident will ensure that all details entered in Demographic form are correct.</p>	Resident	
19.	<p>Correction Required?</p> <p>In case any errors are pointed out to the Operator. go to step no.20, Correct Data</p> <p>Else go to step no. 21, Approve.</p>	Resident	
20.	<p>Correct Data</p> <p>The EA Operator then corrects the errors pointed out and again shows the data to the resident.</p>	Enrolment Agency (Operator)	
21.	<p>Approve</p> <p>If no corrections are required, resident will approve the data.</p>	Resident	
22.	<p>Provide Own Fingerprint to Sign-off the data capture</p> <p>The Operator will then provide own Fingerprint to sign-off the data captured.</p> <p>CIDR will process for an operator that is enrolled and has been added to valid operator list by EA.</p>	Enrolment Agency (Operator)	
23.	<p>Record and Get Supervisor to Sign Off Exceptions</p> <p>The Supervisor may sign off any exceptions observed in Data Collection.</p>	Enrolment Agency (Operator)	<a href="#">5.1.6 Handling Exceptions</a>
24.	<p>Print Consent Letter and Acknowledgement</p> <p>Print Acknowledgement slip and provide to resident.</p>	Enrolment Agency (Operator)	<a href="#">5.2.3 Acknowledgement Slip and Consent Letter(draft format)</a>
25.	<p>Take Consent and file it</p> <p>Operator will take Resident's consent (signature/ thumb impression) and file this copy.</p>	Enrolment Agency (Operator)	
26.	<p>Take Backup for Transfer</p> <p>Operator maintains backup of data captured. Also,</p>	Enrolment Agency	External Process

	Operator exports data to a memory stick and keeps it ready for transfer at a specified location.  Refer 1 <sup>st</sup> Mile Logistics Process for Data Transfer flow and Guidelines	(Operator)	Refer 1 <sup>st</sup> Mile Logistics Process for Data Transfer flow and Guidelines

#### 4.7. Verification Sub Process Flow

#### 4.8. Verification Sub Process Description

S. No	Step	Responsibility	Reference
	Start It is essential that key demographic data is verified properly.		
1.	Type of Verification 2 Distinct methods of verification are discussed in this document g. Based on supporting documents	Registrar	

	<b>3.1. Based on introducer system</b>		
2.	<p>Verify Documents</p> <p>Registrar’s Supervisor verifying the documents should be a pre enrolled resident. He may be covered during the special drive for Introducers.</p> <p>For Verification based on Documents, the Registrar’s Supervisor present at the Enrolment Centre will verify the documents and sign/stamp the documents as a proof of Verification.</p> <p>If pre-enrolment data is used Registrar’s Supervisor will verify those documents (like Ration Card, NREGA job card etc.).</p> <p>In case Enrolment form is used for filling demographic data, then Supervisor will verify form details against PoI, PoA, DoB documents.</p> <p>Verify Name, Date of Birth, Address against PoI, DoB and PoA documents. Refer Guideline 5.1.3 for list of applicable documents.</p> <p>Verify Name and UID of Parent/Guardian in case of children.</p> <p>Registrar’s Supervisor will then sign and stamp the Photocopy of documents verified.</p>	Registrar (Supervisor)	<a href="#">5.1.3. Documents for Verifying PoI, PoA and DoB</a>
3.	<p>Capture Demographic and Biometrics Data and Ready for Transfer Sub Process</p> <p>After verification by Registrar, the Operator will follow the process of capturing Demographic and Biometrics Data and keep it ready for transfer to CIDR.</p> <p>Refer 4.5 Capture Demographic and Biometrics Data and Ready for Transfer Sub Process</p>	Enrolment Agency (Operator)	<a href="#">4.5 Capture Demographic and Biometrics Data and Ready for Transfer Sub Process</a>
4.	<p>Store Documents</p> <p>These documents need to be maintained by the Registrar at least for 7 years from the date of capture or as specified by UIDAI from time to time. In case of any legal requirements, Registrar shall furnish necessary documents as required by UIDAI.</p> <p>The Registrar may store documents in either</p> <ol style="list-style-type: none"> <li>Hard copy or</li> <li>Digitise documents by online scanning during the process of data capture or</li> <li>Digitise documents offline and allot Document Identification Number(DIN) – barcode</li> </ol> <p>Registrar to prescribe suitable documentation management system for easy tracking and retrieval of documents.</p>	Enrolment Agency (Operator)	

	If Scanned offline, bar coding can be useful in tracking, as explained in step no.5. Else End.		
5.	Paste bar coded stickers on Consent Letter, PoI and PoA To save on online scanning cost and time, a Registrar may opt for offline scanning of documents. If this is the case, the Operator will paste pre-printed bar coded stickers on these documents. The bar code will be read and stored on the Resident file. When scanning of documents will take place at a later stage, then the bar code reader will read the bar code on any of these documents. PoI, PoA documents will then be scanned and attached to the data file of the Resident that is retrieved using bar code.	Enrolment Agency (Operator)	
6.	Endorse Resident by giving fingerprint The Introducer will go through all the details to ensure that he endorses correctly. The Introducer ensures that all the residents that he is about to endorse are known and given particulars are correct. The concept of inclusiveness should not take away the credibility of the Introducer system. Any false verification by Introducer shall make him liable for legal action. The Introducer can endorse a resident and vouch for the validity of Resident's information by giving his/her thumbprint in the enrolment software's 'Review' tab. In addition he/she should sign the Enrolment form endorsing the resident. Introducer will validate by giving fingerprint.	Introducer

## A flag is maintained to indicate if Date of Birth (DoB) is verified, declared, or approximate. In case exact DoB is not known, resident should indicate the age only. Enrolment software has the provision to capture age & calculate the year of birth.			
* For infants, Father/ Mother/ Guardian's name (at least one) and UID is mandatory.			
* For children under a particular age, biometric de-duplication will not be done. Hence their UID will be flagged as such until they are biometrically de-duplicated at a later age. Their UID will be linked to at least one of the parent's UID.			
* In the case the adult is not in a position or does not want to disclose, name of either Father/ Husband/ Guardian or Mother/ Wife/ Guardian, select the flag in the enrolment software to indicate that resident has not given the relationship details.			
** For residents with no document proof, an 'Introducer' should certify his/ her identity.			

### **5.1.2 Detailed Guidelines for Recording Demographic Data**

#### **(a) Name**

- The Enrolment Agency should verify the proof of identity documents produced by the individual before recording the name.
- The name of the person in full should be entered in the boxes provided for this purpose. Leave single box between two separate words.
- It is very important to write the person's name very carefully and correctly. For example, the respondent may tell that his name is V. Vijayan whereas his full name may be Venkatraman Vijayan and similarly R. K. Srivastava's full name may actually be Ramesh Kumar Srivastava. Similarly, a female enrolee may tell her name as K. S. K. Durga while her full name may be Kalluri Surya Kanaka Durga.
- Ascertain from her/him the expansion of her/his initials and check the same in the documentary evidence produced before recording the name in full.
- In case of difference in the name declared and the one in document (PoI), the name as declared by the resident may be recorded by the Enrolment Agency provided the difference is only in spelling.
- If two documentary proofs produced by the enrolee have variation in the same name (i.e., with initials and full name), the enrolee's preferred name should be recorded.
- Sometimes the infants and children may not have been named yet. Please try to ascertain the intended name for the child by explaining to the enrolee the importance of capturing the name of the individual for allotting UID.
- In case of non-availability of supporting documents for PoI, the name should be recorded with the assistance of the Introducer.

#### **(b) Date of Birth (DoB)**

- Write date of birth of Enrolment Agency, indicating day, month and year in the relevant boxes provided. Record the day (2 digits), month (2 digits) and year (4 digits).
- In the Date of Birth Field, depending on the clarity / proof provided by the resident, following should be captured:
  1. 'V' – When the DoB can be verified from a documentary evidence
  2. 'D' – When resident declares the DoB without any documentary evidence
  3. 'A' – When the resident is unable to give exact DoB and the approximate age has been given

#### **(c) Gender:**

- Gender has to be recorded by the Enrolment Agency as declared by the enrolee in the box provided by recording Male, Female or Transgender 'M' or 'F' or 'T' respectively.

#### **(d) Residential Address:**

- Record the residential address in the boxes provided.
- The address should be recorded as available in the documentary evidence

produced by the enrolee. Leave space between two words. Please ensure that the particulars are filled up correctly.

- In line 1 of the address capture 'care of' person's name if any. (Usually this has to be captured for children and old age people living with parents and children respectively). If not available, leave the Address line 1 blank.
- Generally in rural areas, Building number, House number etc. are not available. If not available leave the address line 2 blank.
- Write the Street Name, if any, in Address line 3, otherwise leave it blank.
- Write major/minor landmark if any in address line 4 otherwise leave it blank.
- Write name of Mohalla/Locality/Post Office in address line 5, otherwise leave it blank.
- Name of the village/town/city is to be written in address line 6.
- Write the name of District and State in address line 6 and 7.
- Ascertain the Postal Index Number Code(PIN code) and record in the boxes.

**(e) Parent/ Spouse /Guardian Information (Conditional)**

- Filling the father / husband / guardian or Mother / Wife / Guardian field is mandatory for all. If they are enrolled their UID should be recorded.
- In case the adult is not in a position or does not want to disclose, xxx should be recorded in the field.
- In case of children below the age of 5 years one of the parents' or guardian's name is recorded and UID or Enrolment Number is recorded. It is mandatory.
- If the child's father /mother / guardian has / have not enrolled and / or do / does not possess an UID at the time of enrolment, the enrolment of that child cannot be done unless the above requirements are fulfilled.

**(f) Relationship type (Conditional):**

- This field is mandatory if the information in the above field is available, otherwise leave this field as blank.
- Here the relationship type of the above field to be recorded as 'F' for Father, 'M' for Mother, 'H' for Husband, 'W' for Wife and 'G' for Guardian.

**(g) Introducers Name (Conditional):**

- Name of the Introducer has to be recorded in this field in case where enrolee is not able to produce any documentary evidence as PoI and PoA.
- When the enrolee depends on Introducer for proof of verification, the UID of the Introducer is mandatory.

**(h) Mobile Number (optional):**

- If the enrolee possesses and is willing to provide his/her mobile/landline number, this optional field can be filled in.

**(i) Email address (optional):**

- If the enrolee possesses and is willing to provide his/her e-mail ID, this optional field can be filled in.

### 5.1.5 Detailed Guidelines for Collecting Biometric Data

#### a) Fingerprint Capture

1. **Left Hand Fingerprints:** The Enrolee should be requested to place all four fingers of the **left hand** to platen of the fingerprint scanner for the four- finger capture to ensure good contact and maximize the area of the captured fingerprints.
2. If **automatic** capture does not happen, the operator should force the capture through option available in the enrolment software. The capture software will allow forced capture only after at least one attempted automatic capture for that Enrolee.
3. The operator should visually check the image for quality and for typical problems. In case there are problems go back to steps above to retry the capture.
4. If capture is still not possible, move on to the next step to capture the fingerprints of the right hand.
5. **Right Hand Fingerprints:** The Enrolee should be requested to place all four fingers of the **Right Hand** to platen of the fingerprint scanner for the four-finger capture to ensure good contact and maximize the area of the captured fingerprints.
6. If **automatic** capture does not happen, the operator should force the capture through option available in the enrolment software. The capture software will allow forced capture only after at least one attempted automatic capture for that Enrolee.
7. Visually check the image for quality and for typical problems. In case there are problems go back to steps above to retry the capture.
8. If capture is still not possible, move

on to the next step to capture the fingerprints of the two thumbs.

9. **Two Thumbs:** The Enrolee should be requested to place **Two Thumbs** to platen of the fingerprint scanner for the capture to ensure good contact and maximize the area of the captured fingerprints.
10. If **automatic** capture does not happen, the operator should force the capture through option available in the enrolment software. The capture software will allow forced capture only after at least one attempted automatic capture for that Enrolee.
11. Visually check the image for quality and for typical problems. In case there are problems go back to steps above to retry the capture.

#### b) Facial Image Capture

1. **Enrolee Position:** For capturing facial image, it is advisable for the operator to adjust the camera instead of the Enrolee to position herself/himself at the right distance or in the right posture.
2. **Focus:** The capture device should use auto focus and auto-capture functions. The output image should not suffer from motion blur, over or under exposure, unnatural coloured lighting, and radial distortion. Interlaced video frames are not allowed.
3. **Expression:** Expression strongly affects the performance of automatic face recognition and also affects accurate visual inspection by humans. It is strongly recommended that the face should be captured with neutral (non-smiling) expression, teeth closed and both eyes open.

4. **Illumination:** Poor illumination has a high impact on the performance of face recognition. It is difficult for human operators to analyse and recognize face images with poor illumination. Proper and equally distributed lighting mechanism should be used such that there are no shadows over the face, no shadows in eye sockets, and no hot spots.
5. **Eye Glasses:** If the person normally wears glasses, it is recommended that the photograph be taken with glasses. However, the glasses should be clear and transparent so that pupils and iris are visible. If the glasses are with tint, then direct and background lighting sources should be tuned accordingly.
6. **Accessories:** Use of accessories that cover any region of the face is not permitted.
7. However, accessories like eye patches are allowed due to medical reasons. Further, accessories like turban are also allowed as religious practices.
8. Operators need to be trained to obtain the best possible face images that satisfy requirements.

**c) Iris Capture**

1. Iris pattern of each eye is not correlated, and gives two independent biometric feature sets. It assures correct assignment of left and right eyes and allows for more accurate estimation of roll angle.
2. In order to obtain good quality template, the iris image diameter should be a minimum of 170 native pixels.
3. In order to retain sufficient image surrounding the iris for the purpose of identifying the left or right eye as well as for a more accurate iris segmentation, the margins around the iris portion of the image need to be at least 50% of the iris diameter on the left and right sides of the image, and a least 25% of the iris diameter on the top and bottom of the image.
4. The capture device should be more than 300 mm away from the Enrolee to be considered non-intrusive.
5. The capture device should use auto-capture functions.
6. In special circumstances where the Enrolee has to position herself or himself, the capture device should be more than 100mm away but the device should use a visor or other mechanical alignment aid to enable the Enrolee to position themselves.
7. In order to provide an acceptable level of usability and ease of alignment, the camera must allow for some variability in the position of the iris centre relative to the camera. This variability is defined by position tolerances in the horizontal, vertical, and axial dimensions that together define a volume (the 'capture volume') within which the centre of the iris must be located in order to enable image capture.

8. For two eye capture devices, the capture volume dimensions for devices without mechanical alignment aids are 19 mm wide, 14 mm high, and 20 mm deep, and for devices with such aids, 19 mm wide, 14 mm high, and 12 mm deep.
9. The iris image capture device must be capable of capturing light in the range of 700 to 900 nanometres. The camera's near infrared illuminator(s) must have a controlled spectral content, such that the overall spectral imaging sensitivity, including the sensor characteristics, transfers at least 35% of the power per any 100 nm-wide sub-band of the 700 to 900 nm range.
10. The iris image capture sensor shall use progressive scanning.
11. Illumination shall be compliant with illumination standard IEC 825-1 and safety specification ISO 60825-1.
12. In order to achieve acceptable recognition accuracy, the iris acquisition sensor must achieve a signal-to-noise ratio of at least 36dB.
13. Within the frequency range of interest, 700 to 900 nm, the iris sensor shall generate images with at least 8 bits per pixel.
14. The operator and not the Enrolee will handle the capture device.
15. The Enrolee will be required to sit (or stand) in a fixed position, like taking a portrait photograph.
16. The iris capture device or the connected computer would be able to measure the iris image quality. An initial image quality assessment would be done to provide feedback to the operator during the capture process. The device alerts the operator if the captured iris image is of insufficient quality.
17. The iris capture process is sensitive to ambient light. No direct or artificial light should directly reflect off Enrolee's eyes.

### **5.1.6 Handling of Exceptions**

There would be instances where the enrolee would not be in a position to give complete set of biometrics as required by the UIDAI owing to reasons such as injury, amputation of the fingers / hands and similar problems with the eyes. The following sets of guidelines are to be borne in mind while handling such exceptions.

#### **(a) Exceptions in capturing Facial Image capture**

<b>S.No</b>	<b>Problem</b>	<b>Suggestions</b>
a.	Unable to capture image due to poor light:	<ul style="list-style-type: none"> <li>o No flash is to be used.</li> <li>o Contact the local state government authorities to improve the ambient light.</li> <li>o If there is inadequate lighting because of low voltage, use the generator backup to improve the lighting.</li> <li>o Consider moving the enrolment station to a location in the room with better light.</li> </ul>

		<ul style="list-style-type: none"> <li>o The non-capture could be because of bright light behind the backdrop. The backdrop should be preferably placed against an opaque wall/partition.</li> </ul>
b.	Unable to crop image because of turban / head scarf:	<ol style="list-style-type: none"> <li>1.1. If it is strict religious attire, choose the manual capture option.</li> <li>1.2. If the headgear can be removed this may be requested politely by the operator.</li> <li>1.3. In the case of lady enrolees, it would be advisable for a lady operator, or volunteer to undertake this process.</li> </ol>
c.	Enrolee unable to keep head / torso still and vertical:	Assistance may be provided to the enrolee. In case of lady enrolees, assistance is to be provided by the lady operators or volunteers.

**(b) Exceptions in handling Fingerprint Image capture**

S.No	Problem	Suggestions
a.	Missing / amputated / bandaged fingers	<ol style="list-style-type: none"> <li>1.4. The same is noted in the data as provided in the software <ul style="list-style-type: none"> <li>o The fingerprints of remaining fingers are captured by the operator</li> </ul> </li> </ol>
b.	Unable to crop image because of turban / head scarf	<ol style="list-style-type: none"> <li>a. If it is strict religious attire, choose the manual capture option.</li> <li>b. If the headgear can be removed this may be requested politely by the operator.</li> <li>a. In the case of lady enrolees, it would be advisable for a lady operator, or volunteer to undertake this process.</li> </ol>
c.	Fingerprint captured is not of the requisite quality	<ol style="list-style-type: none"> <li>a. If standard image of the finger prints are not possible for an enrolee despite repeated attempts, the operator should politely ask the enrolee to wash his hands. The operator can provide a wet sponge or towel available in the centre.</li> <li>b. The operator can request the enrolled to apply pressure on the platen to increase the area of contact and thereby obtain image of the requisite quality.</li> <li>c. For applying pressure he would firstly rely on efforts of the enrolee. If not successful, the operator can take the permission of the enrolee and assist her/him in applying the pressure to capture the image.</li> <li>d. It has to be ensured that assistance to women enrolees has to be provided by women operators /</li> </ol>

		volunteers. e. The operator would make a reasonable number of attempts to capture the biometrics of the resident. The number of attempts that can be made is built into the software.
d.	Inability to flatten the fingers	a. The operator with due permission from the enrolee may assist the enrolee in order to attempt capture of the fingerprints. b. In case this is not successful, the operator may try to obtain fingerprints to the extent that the enrolee is able to flatten and place her / his fingers on the platen. c. The enrolee can then be made to move to the next set of fingerprints of the other hand or the two thumbs.
e.	Worn out ridges or hands blackened through mehendi or any other substance	a. Attempt a manual capture b. Proceed to capture fingerprints of fingers which are not blackened or without worn out ridges.

**(c) Exceptions in handling Iris Image capture**

If capturing Iris image is not possible due to non-existence of one or both eyes or bandage across one or both eyes / any other deformity or disease the same has to be recorded in the system.

S.No	Problem	Suggestions
a.	Squint / disoriented eye	a. If the capture of both eyes at a time is not possible, the single eye iris scan device may be used b. In case the single eye iris device is not available, the operator can make use of the dual eye device to capture one of the irises correctly
b.	Inability to open the eyes properly	c. Guide the enrolee to open the eyes wide to enable the capture d. Manually assist the enrolee to open the eyes with the help of his own hands so that the iris can be scanned.

**(d) General exceptions**

The enrolee may not be in a position to keep herself / himself in correct posture for reaching biometric instruments or for photograph due to old age or sickness. In such cases the operator should arrange to take the biometric data by moving the equipment close to the enrolee.
